

Smart Green® Soy Penetrant

Fast-Acting, Anti-Seize Lubricant - Helps Penetrate Corrosion!

Bolt Off® does what the name implies; it helps to reduce the friction that make nuts, bolts and other similar things hard to move. This is done by penetrating rust and other corrosion in a fast-acting way, leaving a greased surface aiding movement between the surfaces. In addition, the formulation is designed to stay on the surfaces it is applied to, providing a long-lasting effect.

Within minutes, rusted and seized fasteners are removed with ease. Powerful additives combine to provide the highest performing penetrant on the market. Independent testing proves the effectiveness of Bolt Off (over).

- Teflon and silicone free formulation
- Use on rusted hinges and springs, lug nuts, bolts, pulleys – any corroded fastener!

Item Number	BET-0002
Container Size	8 fl oz.
Cans Per Box	12
Product Appearance	Amber
Odor	Slight
Solvent System	Ester/Mineral Spirit Blend
Propellant	Nitrogen/Carbon Blend
Spray Pattern	Streamer
VOC%	Less than 50%
VOC Compliant for CA & OTC	Yes
Biodegradability	Greater than 90%

- 🌍 **Green solvents made from soy**
- 🌍 **Nitrogen/carbon as a fill in our cans, it is the most inert gas and beneficial to the environment**
- 🌍 **Recyclable and biodegradable packaging, printed with soy ink**
- 🌍 **Aluminum can reduces shipping costs, lowers CO²**

Low VOC's

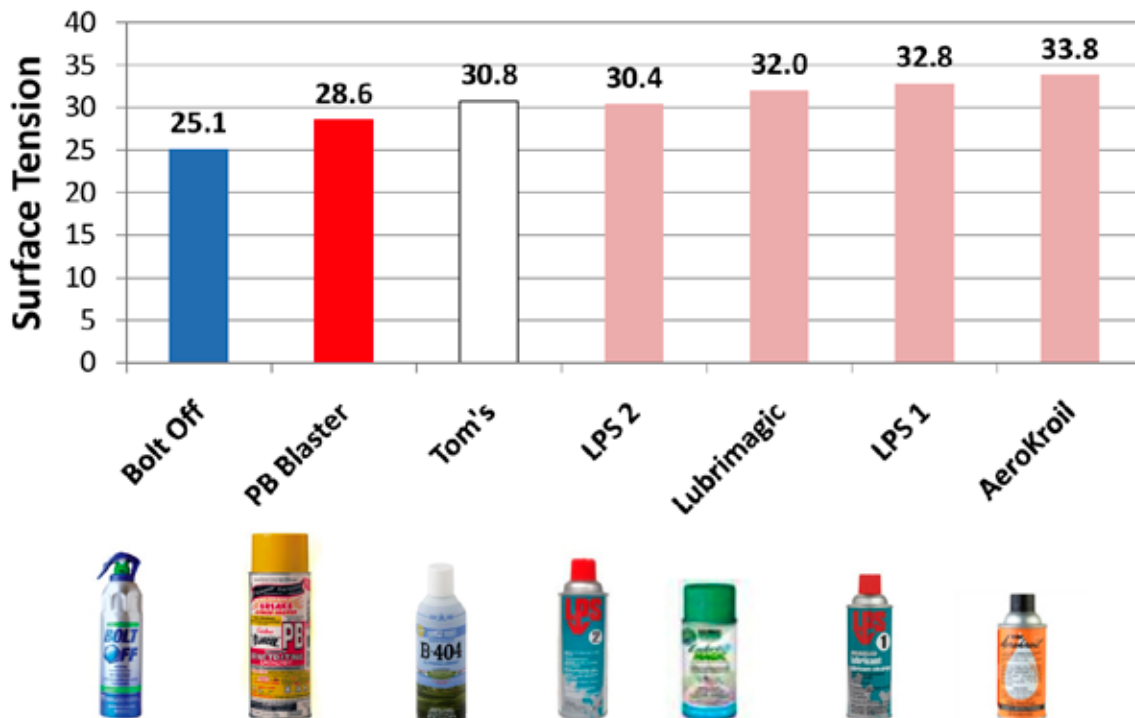

Smart Green® Soy Penetrant

Applications	
Application	Usage
Fleet Maintenance	Lug nut removal, rusted spring release, shock release, other rusted fasteners.
Machinery	Remove rusted blades, bolts and other machine parts.
Production Line Maintenance	Quickly remove and clean conveyors, Release & Lubricate Pulleys, Remove Surface Rust in Damp Environments
Marine	Prevent Rust & Corrosion on Tools Lubricate Cables and Lines
Military	Rust removal from all equipment, highly affective in removing salt corrosion.

Penetration Test¹

Penetration – The lower the surface tension upon spray the better the penetrant performance

1 - Independent Laboratory Testing
