

legris connectic

Legris is the inventor of the push-to-connect fitting and has the widest range of fitting configurations both in fractional inch and metric sizes. Here are some of the Legris products available through Barnes Distribution:

Industrial push-to-connect fittings (LF3000 series)

- Instant connect/disconnect
- Immediate seal of threads
- One of the most extensive ranges on the market

DOT push-to-connect fittings

- Meet all applicable requirements of the DOT FMVSS 106 specification
- No special tools required for assembly

Safety Couplers (C9000 series)

- Vents downstream pressure before disconnecting
- Just 1, 2 and disconnect
- Industrial interchange & ARO 210 profiles

Flow Controls

- Models in composite and metal
- Compact size
- Lock nut
- Stability of adjustment

Tubing

- Fractional inch and metric sizes
- Several colors available for coding circuits
- Packaged in tubepack® for cleaner storage

Whatever the
pressure,
Get connected
with Legris.

Legris Connectic offers low, medium, and high pressure connections.
